

Years 1 - 4 Volume Capacity Warm-Ups

Warm-up

Have a container and ask students what we could measure about it?

Show a bottle that is half full.

Students need to come up with as many things as they can about it.

Get two different shaped containers and ask students which one would hold the most.

Show an unusual shaped container and have a discussion about how would we know it is half full?

Show a container with a measurement on it and tell me everything you know about it.

Brainstorm how many different ways you can buy water.

In small groups give them 2 containers and ask students which one would hold the most.

Show two containers that have liquid in them and ask them which one is holding more liquid.
