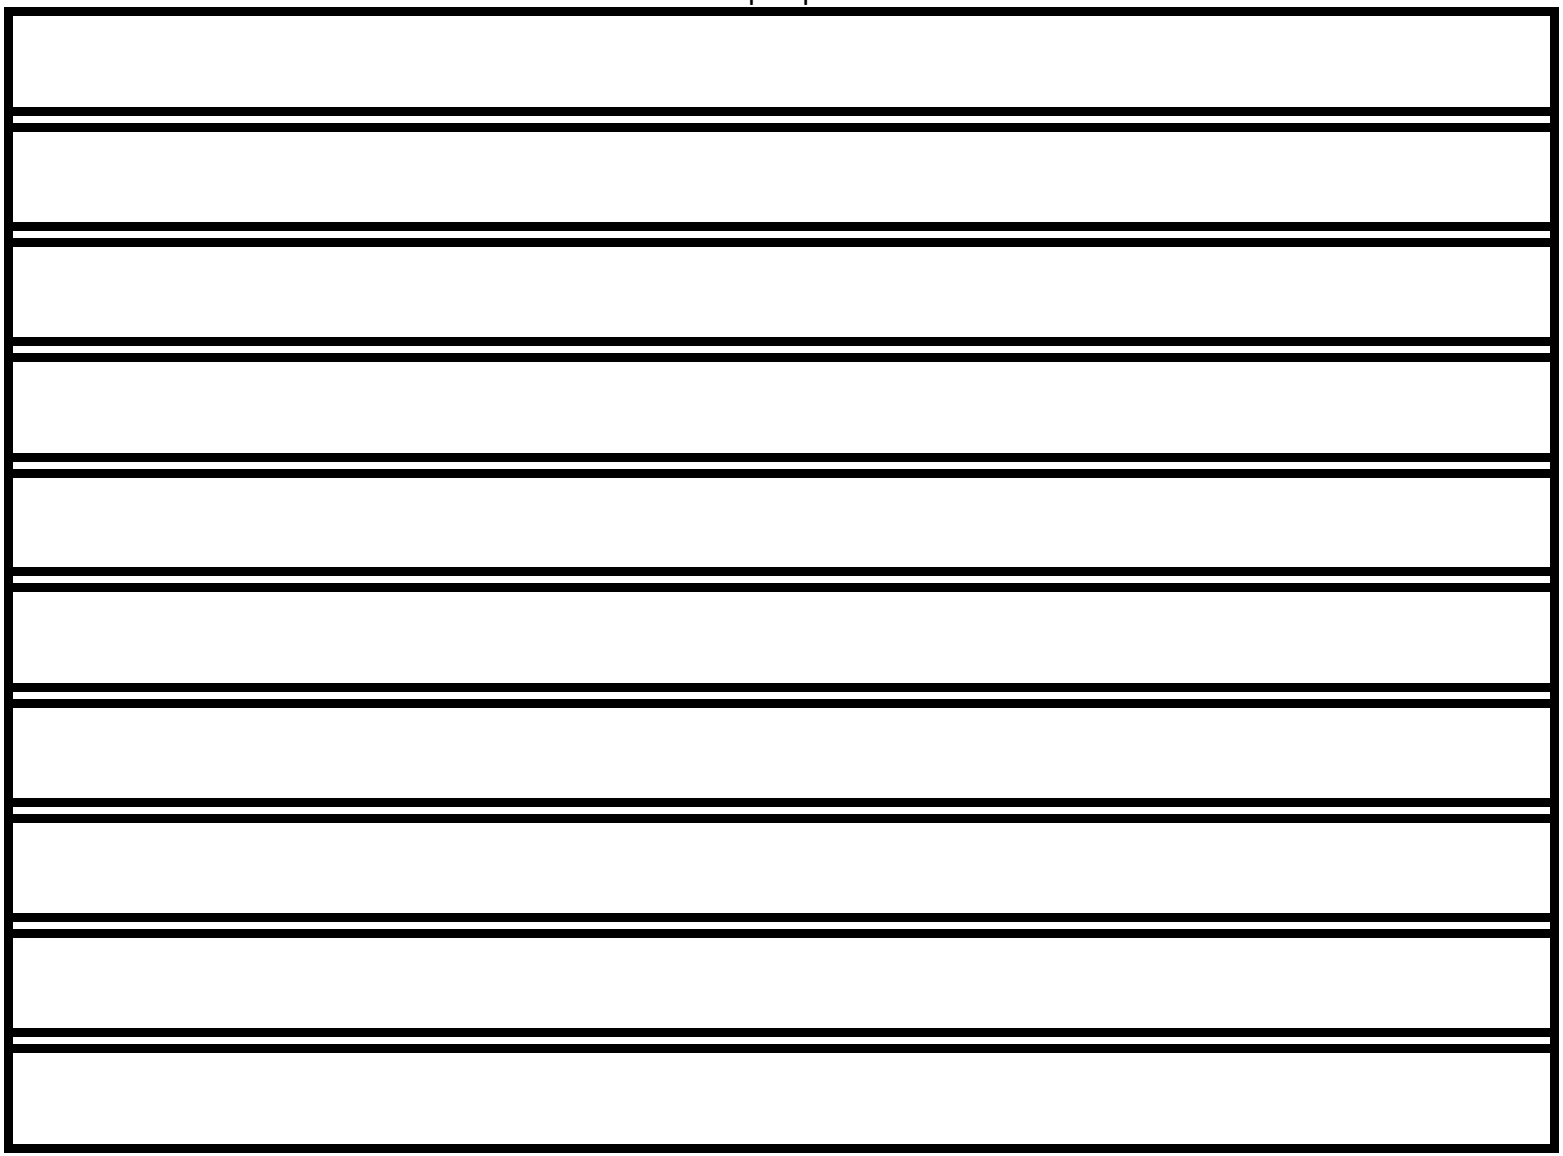
Equal Parts Wall

Divide the following rows into one whole This whole could also be $1 or 1 kg or I metre …, halves; thirds; quarters, fifths, sixths and tenths. No row can have two parts the same eg. not ½ + ½ but ½ + 50% is fine; 25% + 1.4 + 0.25 + 25cm is fine. In the last row (10 equal parts), show a combination of fractions, decimals, percentages & measurements.


Make sure you use your ruler to help you measure as accurately as possible. On the other side of this page, write 5 things you have discovered from making this equal parts wall.
